

Analysis of air_qual vs Price

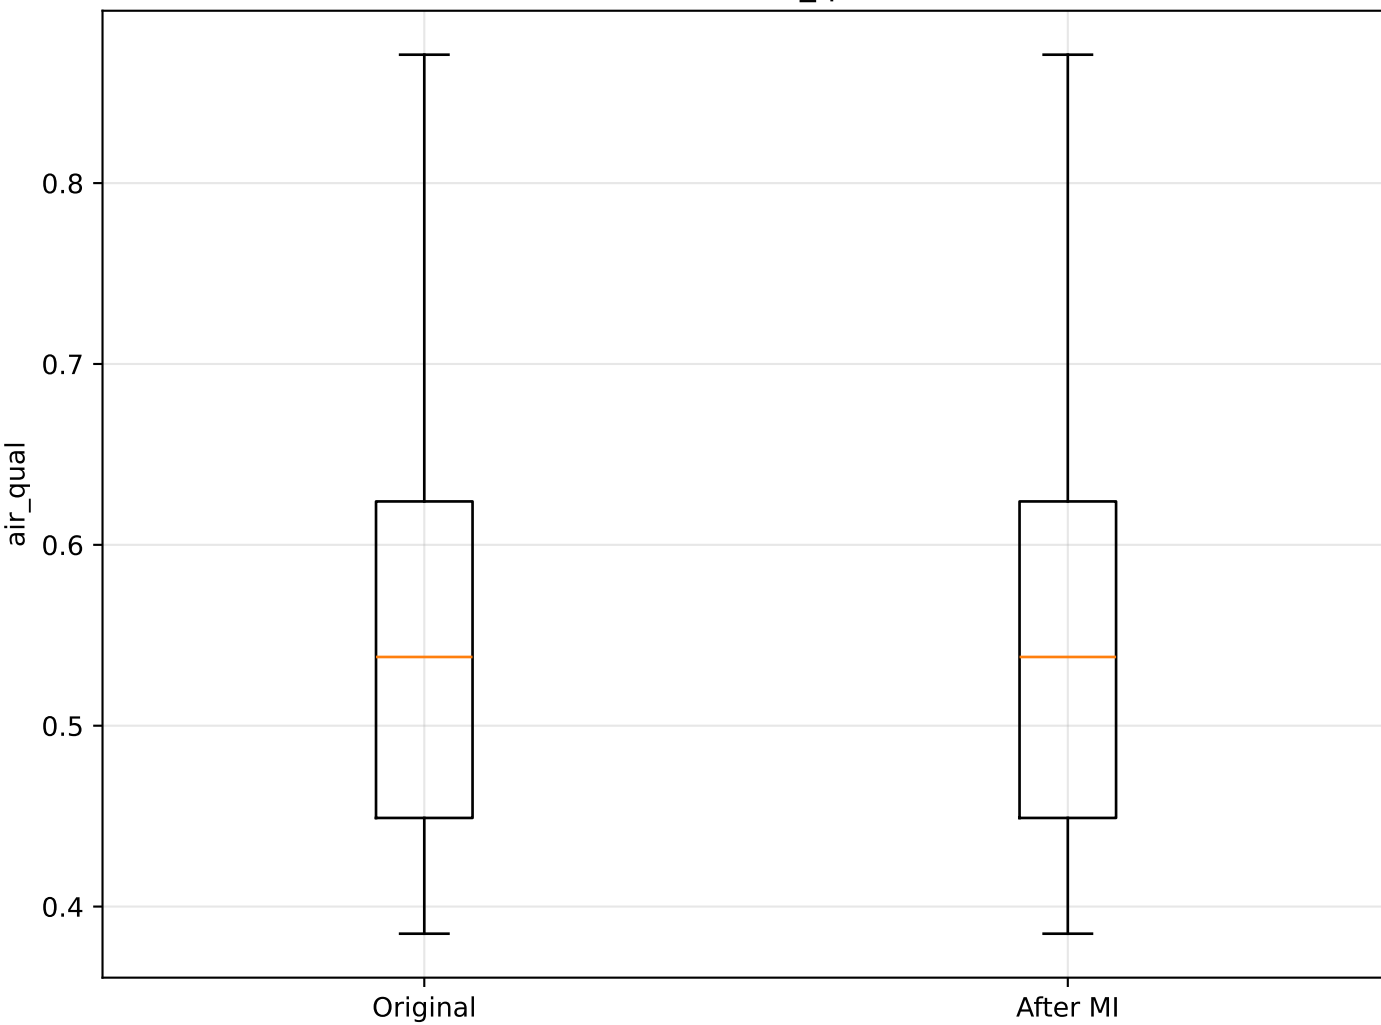

air_qual vs Price: Original vs Imputed

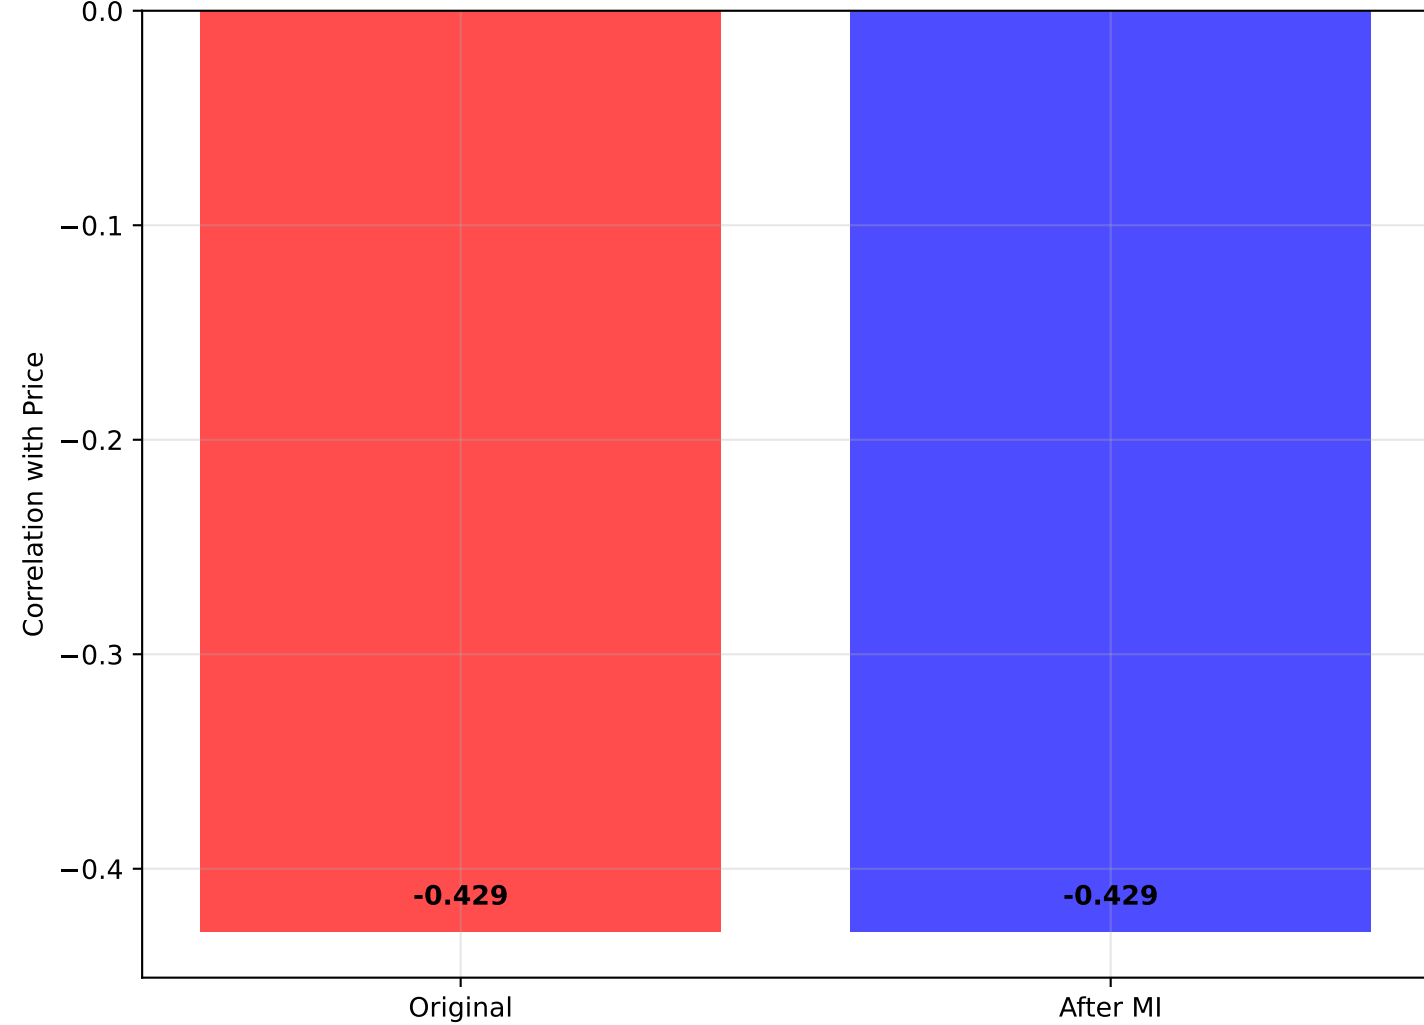

Distribution: air_qual

Box Plot: air_qual

Correlation with Price

STATISTICAL SUMMARY: air_qual vs Price

=====

ORIGINAL DATA:

- Mean air_qual: 0.555
- Std air_qual: 0.116
- Median air_qual: 0.538
- Correlation with Price: -0.429
- Outliers detected: 0

AFTER MULTIPLE IMPUTATION:

- Mean air_qual: 0.555
- Std air_qual: 0.116
- Median air_qual: 0.538
- Correlation with Price: -0.429

REGRESSION ANALYSIS:

- Original R^2 : 0.184
- Imputed R^2 : 0.184
- Change in correlation: +0.000

INTERPRETATION:

Better air quality is positively correlated with higher prices. Minimal correlation change after outlier handling (+0.000)
